Stroke Rehabilitation Related Apps - Canadian - Free

Visit https://www.viatherapy.org/ for more details.

The iWalk Toolkit was designed to promote an evidence-informed approach to using the 10-metre walk test and the 6-minute walk test post-stroke. The app is part of the toolkit which also includes the iWalk Guide and demonstration videos which are available at http://www.iwalkassess.com/.
Stroke Rehabilitation Related Websites - Canadian

CorHealth Ontario - Core Competencies
https://www.corhealthontario.ca/resources-for-healthcare-planners-&-providers/core-competencies
The purpose of the framework is to provide health care professionals working in stroke with a clear, comprehensive way to achieve the core competencies needed for evidence based stroke care. For each competency, there are a number of learning objectives, recommended learning resources/knowledge translation tools and suggested evaluation methods.

CorHealth Ontario - Stroke Quality-Based Procedures Resource Centre
https://www.corhealthontario.ca/resources-for-healthcare-planners-&-providers/stroke-general/qbp
This resource centre provides health system planners and clinicians with tools and resources to support implementation of Stroke Quality-Based Procedures across the care continuum.

Canadian Stroke Best Practice Recommendations (CSBPR)
https://www.strokebestpractices.ca/recommendations
The CSBPR are intended to provide up-to-date evidence-based guidelines for the prevention and management of stroke, and to promote optimal recovery and reintegration for people who have experienced stroke (patients, families and informal caregivers).

Evidence-Based Review of Stroke Rehabilitation (EBRSR)
http://www.ebrsr.com/
The EBRSR includes in-depth reviews of well over 4500 studies including a significant number of randomized clinical trials. In addition to the evidence reviews there is a clinician’s handbook and educational modules.

Stroke Engine
https://www.strokengine.ca/en/
This website was built with the goal of bridging the gap in knowledge translation between research findings and current clinical practice. It provides information for both families and health professionals who work in the field of stroke rehabilitation. It can be used to find the most current information about the value of the various interventions as well as psychometric and pragmatic properties of assessment tools used in used in stroke rehabilitation. There is also an E-learning section that offers educational modules with practical info for clinicians and patients and their families.

Heart and Stroke Foundation Canadian Partnership for Stroke Recovery (CPSR)
https://www.canadianstroke.ca/
The CPSR was the first research organization in the world dedicated exclusively to stroke recovery. The partnership brings together organizations from across Canada to focus on research with the biggest potential impact. Partners include the University of Ottawa, The Ottawa Hospital, Sunnybrook, Baycrest, Toronto Rehabilitation, Memorial University, UBC and the University of Calgary/Hotchkiss Brain Institute. The website directs the reader to information on recent and upcoming research trials and upcoming educational events around the recent research. There is also the option to sign up for a monthly E-newsletter.

Post Stroke Transitional Care Program
https://www.northeasthealthline.ca/search/SearchResult.aspx?q=post%20stroke&start=0&p=0
This website will direct you to contact info for the community stroke navigator in your area who will be able to inform you of the local offerings of the post stroke transitional care program.
